PROFESSIONAL SUMMARY

Results-driven Full Stack / MERN Developer with 4+ years shipping production web applications end-to-end ? from database schema and REST/GraphQL APIs to polished React/Next.js frontends and AWS/Docker deployment. I build fast and ship real: 25+ live deployed products including an AI knowledge vault (multi-LLM + Whisper voice), a candidate job portal, and an enterprise Transportation Management System with GST invoicing and role-based access control. I am an AI-assisted developer by default ? Claude Code, Cursor, Gemini CLI, and GitHub Copilot are part of my daily workflow ? which lets me deliver features 3?5x faster without sacrificing quality. Comfortable owning a feature 0?1, writing reusable component libraries, and owning the test/deploy pipeline. Actively seeking fully remote Full Stack, Frontend, or AI Engineering roles worldwide.
